Last Updated: 22 February 2026

EDUCATION

University of Wisconsin–Madison

Ph.D. Geoscience, distributed Ph.D. minor in Data Science

Expected May 2027

Advisor: Dr. Chloë Bonamici

Dissertation: Constructing Tectonic-Fluid-Mineralization Histories for Ancient Convergent Margins

University of Wisconsin–Madison

M.Sc. Geoscience

August 2022

Advisors: Dr. Annie Bauer and Dr. Chloë Bonamici

Thesis: Multiphase Petrochronology of Archean Gneiss Complexes

University of California–Santa Barbara

B.Sc. Earth Science, minor in Spatial Science

June 2020

Advisor: Dr. Roberta Rudnick

Thesis: Origins and Evolution of the Lower Crust Beneath Central Madagascar

RESEARCH INTERESTS

The integration of field and petrologic observations with geochemical modeling and microanalysis (SEM, EPMA, LA-ICP-MS, RAMAN, and SIMS) to reconstruct tectonic, metamorphic, fluid, and mineralization histories. Tectonomagmatic and fluid controls on ore mineralization, high temperature metamorphism and melt production in the continents, crystallization and modification of mineral geochronometers during metamorphism and fluid interaction, deep crustal fluid flow, the evolution of tectonics, and craton assembly.

PROFESSIONAL EXPERIENCE

University of Wisconsin–Madison

Graduate Dissertator and Teaching Assistant

September 2023 – Present

Advisor: Dr. Chloë Bonamici

• Research:

- * For my PhD, I am studying the geologic conditions for critical mineral formation and fluid transport during mountain belt formation in USA.
- * Lead PI on a project, in collaboration with researchers from UW-Madison, Central Michigan University, and Penn State University, that uses petrochronology to constrain the timing of lithium-rich pegmatite emplacement in northern WI and relate emplacement to the regional tectonic history.
- * Graduate researcher on an NSF-funded collaboration between PIs from UW-Madison and Northern Arizona University using stable isotope geochemistry, petrochronology, and numerical modeling to determine the source(s) and timing of metasomatism in western North America during the Laramide orogeny.

• Mentorship:

- * Trained and mentored 5+ undergraduate students on research in lab and field-based settings, writing grant proposals, technical and thesis writing and presentations, coding, and applying to graduate school.
- * Mentored students from other universities through the Geosciences Education and Mentorship Support (GEMS) program, GSA Geochronology Division Mentorship program, and existing collaborations.
- * Supported student mentees with Pell grants or requesting physical accommodations.

• Service:

- * Acquired funding for and developed “Monday Community Mornings”, a weekly community program in the Geoscience Department that promotes collaboration and mentorship between faculty, students, and staff.
- * As former President and current Professional Development chair for the department Geoscience Graduate Student Association (GGSA), I am experienced in communicating with department leadership; organizing career panels, workshops, retreats, and research symposiums; and managing substantial financial budgets.

• Teaching:

- * Lab Instructor for Introductory Geology (GEO 100) and Elementary Petrology (GEO 370), where labs reinforce lecture material through hands-on learning, such as working with geologic maps or petrographic microscopes.
- * Core tenets of my teaching include student participation in learning plan design, integrative pedagogy, active learning, community building, and advocacy, which guide lab design and implementation.

The Pennsylvania State University
Researcher in the LionChron LA-ICP-MS lab

October 2022 – May 2023
Supervisors: Dr. Andy Smye and Dr. Josh Garber

• **Research:**

- * Combined LA-ICP-MS and EPMA techniques with diffusion and phase equilibria modeling to study trace-element systematics in minerals from ultrahigh-temperature crustal xenoliths.
- * Results from this work constrain the heating mechanisms for active lower crustal melting in western North America and empirically validate experimentally-determined garnet diffusion mechanisms.
- * Informally mentored several undergraduates and junior graduate students on LA-ICP-MS instrumentation.

University of Wisconsin–Madison
Graduate Researcher in the ICP-TIMS lab

September 2020 – August 2022
Advisors: Dr. Annie Bauer and Dr. Chloë Bonamici

• **Research:**

- * Developed and applied LASS-ICP-MS and EPMA techniques used to interpret titanite and apatite U-Pb ages in some of the oldest rocks on Earth: the Acasta Gneiss Complex and the Watersmeet Gneiss.
- * Experienced in preparing tantalum filaments for tuning and running Rb-Sr analyses using Sector 54 TIMS, U-Th-Pb anion-exchange chromatography, isotope dilution (ID-ICP-MS) analysis, making synthetic solutions as analogues for mineral compositions, and general clean lab practices, such as pipetting small volumes, titrations, and cleaning/sterilizing pipette tips and sample vials.
- * Worked as advanced user in electron microbeam lab doing SE and BSE imaging; WDS X-ray spot analyses and mapping of major, minor, and trace-element concentrations, including small X-ray activation volume measurements; developed graphic user interface EPMA data software to streamline data reduction, quality checks, and visualization; UW-Madison course, GEO 777, on advanced theory and practice of electron microbeam techniques.
- * Developed independent proficiency in these labs and informally mentored other graduate and undergraduate researchers in best practices and methods.

University of California–Santa Barbara
Undergraduate Researcher and Student Instructor

October 2017 – July 2020
Supervisors: Dr. Roberta Rudnick and Dr. Francisco Apen

• **Research:**

- * Conducted Senior Honors thesis researching granulite-facies xenoliths, sampled in Madagascar, combining petrography with LA-ICP-MS, EPMA, and phase equilibria modeling techniques to determine past thermal state of the lower crust in central Madagascar.
- * Acknowledged in Apen et al., 2020 and Apen et al., 2024 for assistance with mineral separation, LA-ICP-MS sample preparation, and field work for lower crustal xenolith studies of Tanzania and Montana, USA.
- * Independently prepared 50+ samples for whole-rock geochemistry and/or U-Pb accessory phase geochronology using rock saw, hand crushing, shatterbox, fusing glass beads for XRF, Frantz magnetic separation, heavy liquids separation, picking and mounting minerals, and characterizing minerals with FEI Quanta 400F FE-SEM and CAMECA SX-100 EPMA.

• **Teaching:**

- * As an undergraduate teaching assistant for Introduction to Geochemistry (EARTH 124 IG) I hosted weekly office hours, graded assignments, and developed practices for presenting constructive feedback and adapting teaching styles to accommodate a wide range of student needs.

PUBLICATIONS AND THESES

Droubi, O.K., Bauer, A.M., Bonamici, C., Nachlas, W.O., Garber, J.M., Tappa, M.J., and Reimink, J.R. (2025). Eoarchean–Paleoproterozoic Tectonothermal History of the Acasta Gneiss Complex Constrained by Titanite and Apatite Petrochronology. *Geochemistry, Geophysics, Geosystems*, 26(7), e2025GC012294.

Droubi, O.K., Cipar, J.H., Smye, A.J., and Garber, J.M. (2024). Xenolith petrochronology (San Luis Potosi, Mexico) constrains heat sources for Cenozoic ultrahigh-temperature metamorphism in the lower crust. *Journal of Geophysical Research: Solid Earth*, 129(8), e2024JB029138.

Droubi, O.K., Bauer, A.M., Bonamici, C., Nachlas, W.O., Tappa, M.J., Garber, J.M., and Reimink, J.R. (2023). U-Th-Pb and trace element evaluation of existing titanite and apatite LA-ICP-MS reference materials and determination of $^{208}\text{Pb}/^{232}\text{Th}$ - $^{206}\text{Pb}/^{238}\text{U}$ date discordance in Archaean accessory phases. *Geostandards and Geoanalytical Research*, 47(2), 337-369.

Droubi, O.K. (2020). Origins and evolution of the lower crust beneath central Madagascar: Insights from granulite-facies xenoliths in rift basalts (Undergraduate Senior Honors thesis, University of California-Santa Barbara)

MANUSCRIPTS IN PREPARATION

Droubi, O.K., Bonamici, C., Bauer, A.M., Garber, J.M., Tappa, M.J., Nachlas, W.O., and Reimink, J.R., Same tectonic history, different records: Petrochronologic insights from interleaved lithologies within the Watersmeet gneiss dome, MI, USA. (*in prep for Geochemistry, Geophysics, Geosystems*)

AWARDS & GRANTS

Graduate Awards

- Institute on Lake Superior Geology, Doug Duskin Student Paper Award (2025)
- UW-Madison Dept of Geoscience Weeks Research Assistant Fellowship (2023)
- Geological and Mineralogical Society, Annual Metamorphic Studies Group meeting, Best Student Poster (2023)
- UW-Madison Dept of Geoscience, Outstanding Student Publication (2023)
- UW-Madison Dept of Geoscience Weeks/Senger Research Assistant Fellowship (2021; 2025)
- UW-Madison Advanced Opportunity Fellowship (2020, 2026)

Undergraduate Awards

- UC-Santa Barbara Dept of Earth Science, Charles D. Woodhouse Award (2020)
- UC-Santa Barbara Dept of Earth Science, Distinction in the Major Award (2020)
- UC-Santa Barbara Dept of Earth Science, Outstanding Academic Achievement Award (2020)
- Coast Geological Society Award (2020)
- UC-Santa Barbara Dept of Earth Science, Field Award (2019)

Grants

- Geological Society of America North-Central Section Student Travel Grant (2025, 2026)
- Geological Society of America MGPV Division Student Travel Grant (2025)
- Institute on Lake Superior Geology, Eisenbrey Student Travel Award (2025)
- Institute on Lake Superior Geology, Joe Mancuso Student Research Award (2024)
- UW-Madison Dept of Geoscience, Graduate Student Research Grant (2024)
- UW-Madison Dept of Geoscience, Katharine Fowler-Billings Award, "Monday Community Mornings" (2024–2025)
- Geological Society of America Graduate Student Research Grant (2021)
- UC-Santa Barbara Undergraduate Research and Creative Activities (URCA) Grant (2019)

PRESENTATIONS (*DENOTES STUDENT ADVISEE)

- Droubi, O. K.**, 19 March 2026, Is that copper or lithium in your backyard? Exploring Proterozoic Wisconsin tectonics, magmatism, and mineral deposits. Invited Talk at Wisconsin Geological and Natural History Survey.
- Hellrung, A.*, **Droubi, O. K.**, Ruggles, C.E., Bonamici, C.E., 2026, Using anisotropy of magnetic susceptibility and geochronology from the Bush Lake pluton, Florence County, WI to understand the final stages of the Penokean orogeny. Geological Society of America Abstracts with Programs. Vol. 58, No. 1 (Poster)
- Droubi, O. K.**, Ruggles, C.E., Bonamici, C.E., 2026, Investigating the source for Mesoproterozoic lithium-cesium-tantalum pegmatites in northern WI: an integrated geophysical and geochemical approach. Geological Society of America Abstracts with Programs. Vol. 58, No. 1 (Poster)
- Droubi, O. K.**, Craddock Affinati, S., Hoisch, T. D., Blum, T., Kitajima, K., Bonamici, C.E., 2025, Reconstructing Fluid Histories for Metasomatic Rocks in the Big Maria Mountains and Cargo Muchacho Mountains, Southeastern California, using Oxygen Isotopes and U-Pb Geochronology. Geological Society of America Abstracts with Programs. Vol. 57, No. 6 (Oral)
- Droubi, O. K.**, Schoonover, E.J., Sirbescu, M.L.C., Garber, J.M., Bonamici, C.E., 2025, Mesoproterozoic Lithium-Cesium-Tantalum Pegmatite Mineralization Constrained by U-Pb Titanite and Apatite Geochronology. Geological Society of America Abstracts with Programs. Vol. 57, No. 6 (Oral)
- Craddock Affinati, S., **Droubi, O. K.**, Hoisch, T. D., Bonamici, C.E., Cummings, C., Durica, Z., Epstein, G., Haxel, G.B., Jacobson, C.E., 2025, Miocene ages of monazite and titanite in Orocopia Schist and included metasomatized rocks at Cemetery Ridge, southwest Arizona. Geological Society of America Abstracts with Programs. Vol. 57, No. 6 (Oral)
- Hoisch, T. D., Craddock Affinati, S., **Droubi, O. K.**, Mastorakos, B., Bonamici, C.E., Jacobson, C.E., Epstein, G., Haxel, G.B., 2025, Pressure-temperature path from the Laramide shallow-angle subduction channel determined from Orocopia Schist, Chocolate Mountains, southeastern California, and implications for evolution of the subduction system. PROFESSIONAL SKILLS

- Instrumentation:** To use the microanalytical techniques in my research I have developed advanced experience in sample preparation for and operation of the following instruments: Thermo Scientific Element XR HR-ICPMS and iCAP RQ-ICP-MS, Agilent 8900x MS/MS ICPMS, Nu Plasma II MC-ICP-MS, Sector 54 TIMS, CAMECA IMS 1280 (SIMS), CAMECA SXFiveFE and SX-100 EPMA, Hitachi S3400N VP-SEM, Horiba LabRAM HR Evolution Raman
- Field Work:** Over 100 days of field experience as a leader, teacher, assistant, and student making geologic maps, taking structural measurements, and/or sampling for geology research. Experienced camper, backpacker, and rock climber.
- Data Science:** Advanced skills in data compilation, management, and analysis using Python, GIS, and Microsoft Excel. Specific strengths include manipulating large datasets, automated report generation, geospatial data analysis, machine learning for statistical analysis, natural language processing, and graphic user interface development.
- Software:** Python, Iolite, QGIS/ArcPro, IsoplotR, Probe for EPMA, PerpleX, Theriak-Domino, MS Office and Adobe
- Certifications:** Adult Mental Health First Aid (Sep 2025); American Red Cross Adult and Pediatric First Aid/CPR/AED (Sep 2025).
